

## **All the long age dating techniques have been proven to be false, even isochron radioactive isotope dating – part 1.**

Evolution and billions of years has been proven to be false with many infallible proofs. Thus, the fossil containing rock layers are not many millions of years old with the fossils showing descent through evolution but proof of 6-day creation about 6000 years ago and a worldwide flood about 4500 years ago.

This is the first in a series of threads that will now refute all dating techniques which supposedly show very old ages of things. The first part will concentrate on dating things by using radioactive dating techniques even isochron dating. The evidence will show that radioactive dating of things with a known young age yield vastly large and inconsistent dates. That shows they are unreliable with an error range of  $\pm 100\%$ .

The evidence will show also that radioactive dating using either the same isotope or different isotopes, even using isochrons, yield very different dates on the very same things. This they are inconsistent and again show an error range of  $\pm 100\%$ .

The evidence will also show that many things that are supposed to be very many millions of years old are not C-14 dead and thus only thousands of years old. The evidence will further show that almost all “clocks” show that the earth, the universe, and everything else, are not billions of years old, or millions of years old, but thousands of years old. This further proves that anything that shows a very old age must be wrong. The only explanation for these inconsistencies is some miraculous events like 6-day creation, the fall in the garden and the worldwide flood.

The following links show that things with a known young age yield vastly large and inconsistent dates. This by itself shows that no old date can be accepted from radioactive dating. It is impossible to verify and calibrate it for known ages. Furthermore, the rock layers cannot be dated by these techniques and using the fossils they contain, including index fossils, is just pure circular reasoning with no data at all. The rock layers are dated by the assumed age of the rock layers and the assumed age of the fossils they contain. And the fossils are dated by the assumed age of the rocks that contain.

Also, note that the accumulation of DNA mutations errors, especially mitochondrial DNA, by all species proves species are less than 10,000 years old. So, all fossils are less than 10,000 years old. And the rock layers that contain the fossils must be less than 10,000 years old. Thus, all dating of things by whatever means that yield old ages for things on the earth or in the rock layers are falsified. And all canyons, glaciers, ice cores, varves, etc. must be less than 10,000 years old. But it also proves that the earth must be less than 10,000 years old, because all the surface of the earth is less than 10,000 years old. And there is no other catastrophe that could have produced all the fossils and rock layers except the worldwide flood. Massive bombardment by asteroids could not have done it as they would have left a telltale sign. Massive magma flows

from underground could not have done so as the rock layers are not from such and show signs of flood deposition. And the common descent of species is falsified as life has only existed for less than 10,000 years. That only leaves a common creation by the Creator to explain all similarities, which is proved by the principle that all designed things have a designer. And since the earth is less than 10,000 years, so is the moon. And that means that the long age dating of anything from the moon is proved false.
